Public and Product Liability Insurance to \$20,000,000

Workers Compensation

Who Are Direct Ergonomics?

Direct Ergonomics is a supplier of ergonomic office furniture to Government and corporate organisations. We have an extensive range of sit-to-stand and static workstations, portable sit-to-stand desk units, a long list of ergonomic task, executive and visitor seating, and creative collaborative seating. Ultimately this makes Direct Ergonomics a one-stop shop for your office fit-outs and active workspace creation. We are able to supply under several Government contracts including Defence Force and Smart Buy.

Supplier to Department of Defence National Scheme for office furniture, workstations, sit-to-stand desks, storage, filing, reception furniture, tables, and ottomans.

Direct Ergonomics is a supplier to the NSW State Government under SCM 0771 for both small scale re-quirement under \$100,000 and large scale requirements over \$100,000.

Why Choose Direct Ergonomics?

We are the first chosen for schoolyard footy, we are the class valedictorian and homecoming queen, we have the experience and the knowledge to get you the best product and service on the market, and we'll do it cheaper too! Need another reason? Here's three.

01

We LOVE Australian-made products. The majority of our furniture is made in Australia. We also have our ISO9001 certification for Standards in Quality Assurance, and AFRDI Certification on our range of ergonomic seating, visitor and executive seating, and workstations. So you can rest easy knowing that you're getting the best quality product we can find.

02

We have our ISO14001 certification for Standards in Environmental Management, and over half of our range is GECA certified! We were one of the first in our industry to use water-based non-toxic glues, and we offer recycling options to all our customers, ensuring maximum points on the Green Building Council Matrix.

03

We are a small, family-owned business. Whenever possible, we aim to support other small businesses throughout our entire production process. We also preference Indigenous or female owned businesses wherever possible, and aim to use local installation teams on large-scale projects.

Australian-Made First.

It's not always possible, but when we can, we will always give preference to locally produced, Australian-made furniture, from Australian-owned factories and companies.

We believe in strengthening the local economy by using local installers and manufacturers, and using small businesses wherever possible.

Coast-to-Coast Delivery and Installation.

No matter where in Australia you're based, we'll deliver to you. Our network of installers cover the entire continent, ensuring there'll always be someone there to make sure your space is set up exactly how you want it.

We'll also take all our rubbish with us, so you can relax in your new, clean office.

Supporting Local Communities

We are proud of our Indigenous Heritage, and want to give back to disadvantaged communities in the Moree region, where our Gamilaraay / Kamilaroi forbears lived for generations pre-colonisation.

We give preference to installation and manufacturing companies owned and run by Indigenous-Australians, and a portion of our profits from selected products are given to programs assisting Indigenous communities in rural NSW.

Our Services

Project Planning and Design.

Need a hand? Direct Ergonomics offers space and project planning to help design your new office area. We'll help measure your space and make sure there's enough room and equipment for everyone to work comfortably and within compliance standards.

We'll incorporate your advice on filing and storage, WH&S and individual requirements to ensure that the end result is a fully functioning area that adds to the wellbeing of the organisation - for a better working environment. We can assist with your product specifications, produce prospectus and shop drawings, and consult on style and colour.

Stand Out from the Crowd.

Can't find what you had in mind? Need items of a specific size, colour, finish, or fabric? Our wide range of suppliers, in addition to in-house production, means there's no design that can't be manufactured. Let us know how we can help you create the space you need. We'll source the best materials from our reliable suppliers, so you get exactly what you want at the best possible price.

Need it Quick?

Some items are available for quick ship, which means they are generally held in stock, and able to ship straight away.

Not a Hoarder?

We know you'll love your new products, but how will you get rid of the old ones? Let us take care of that with our recycle service. When we deliver your shiny new furniture, we can take the old stuff with us, so you can come back to a clean, junk-free office.
*Recycle service pricing depends on location and availability,

Artwork by David (Crockett) Cragie, mentor and artist for Moree TAFE. Tour guide and advisor for the Mehi Gallery and Studio. David is a Kamilaroi Man and Moree Local.

Direct Ergonomics' Indigenous Heritage and Commitment

Direct Ergonomics is a family owned company, currently owned and run by Donna McMullen. Direct Ergonomics was started back in 1986 by the McMullen Family – Alan and Brett. Donna became heavily involved within the first 3 months of its operation and has been hands on ever since.

14 years ago, it became known that the McMullen Family has Indigenous Heritage. This heritage was stolen from us and the secret died with the passing of Donna's Grandmother, Dorothy McMullen (nee Taylor). Alans' Great Great Grandmother was a Gamilaraay/Kamilaroi woman named Mary Madden. This ancestry was clouded by Alans' Grandmother and her family, being brought to light over the last two decades of diligent peeling back of the layers of concealment. We are enjoying meeting relatives we never knew we had and enjoying being part of our Mob in Moree.

Today, Donna and Direct Ergonomics embrace this heritage. We aim to maintain diversity in our staffing across the entire company and endeavour to work with Indigenous suppliers and customers at every opportunity, including installation and delivery teams all over Australia.

We run several Indigenous Programs in an effort to 'give back' to our community.

Program One : Indigenous Cadetship Program that is aimed at helping Indigenous youth become job ready. It is a paid position running 8-12 weeks that aims to prepare the cadets with a solid work ethic and exposure to an office environment. Mentoring, assisting in resume preparation, and career guidance are all part of the program.

Program Two: Our Stand UP Program ensures \$10 of the purchase price of all the products in the StandUP Range goes to Youth Programs in Rural Australia. Last year we raised over \$10,000 to date, This year our aim is to double it and with your help we just might reach it

Program Three : Boots N All is a new Program aimed at school children and getting them onboard to help out their fellow sportsmen in the bush. We rally around to get 'slightly used' boots and shoes and then send them on to Indigenous Communities that don't have access to new boots every season.

We are proud to be a Certified Indigenous Business with Supply Nation.

We are a proud member of IDIC – Indigenous Defence Infrastructure Consortium.

Eco Table

Tables

We have a variety of table styles available for you to customise your space. These include meeting tables, conference, training, break out, boardroom, and executive options.

Tables are available in 25mm laminate in a variety of colours with matching ABS edge or 33mm timber veneer with matching solid timber edge.

Standard Colours:

Metal Frame tables can be used for student tables, meeting, breakout or even work benches. These are not cheap imported tables, they are strong, quality tables that will stand the test of time.

Standard Eco Table features 25mm square tube metal fully welded under frame. Standard colours are grey tops on black frames. Other colours and sizes are available, including custom tables to your desired dimensions. Ask our sales team to guide you through the many options available.

Australian Made. GECA certified. 10 year warranty.

Workstations

Our bodies were designed to move – to hunt and gather and then later to tend the fields and crops. But with the modern world and the arrival of technology (the motor car, the very comfortable lounge chair, grocery stores, TV's, computers and, of course, the desk job) comes the arrival of back pain and weight gain.

We have been helping bodies move for nearly 30 years. Yes, even before it was fashionable to have a sit to stand desk, we have been supplying them to offices throughout Australia.

Our range of Sit to Stand Desks comply to Australian Standards, are AFRDI tested and approved and are available on the State Government Contract and Department of Defence Standing Offer, to make buying even easier.

Custom sizes are available and a wide range of styles. Contact our team today to arrange a quote, 02 8437 5400, or email sales@directergo.com.au. Please talk to our sales team about the many options available, including, but not limited to, custom size workstations, back-to-back desks with dividing screens, workstation clusters, radius edges, cable management, in-desk services, non-standard colours and volume discounts.

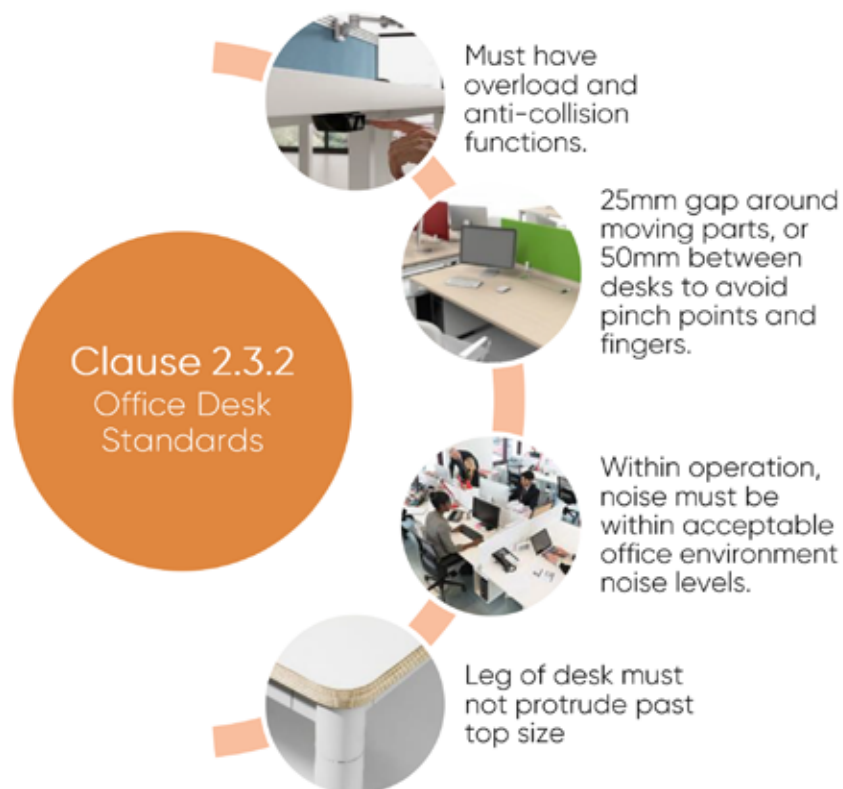

Summary of Australian Standards

Summary of Australian Standards 4442: 2018

Quick reference guide to new Aust Standards for Office Desks and Workstations.

Clause 2.3.2 – Office Desk Standards – Sit to Stand Workstations

Clause Summary – Standard Sizes for Office Desks and Workstations

Single Task: 1200 x 750

Multi-Task: 1600 x 750

Clause 3.6.6 – Summary of Primary Worktop Heights

Function	Worktop Height Range (mm)	
	Fixed	Height Adjustable
Sitting Height	710-770	620-845

Ergonomic Accessories

The typical full-time employee spends about a third of their time at work. Why would you settle for spending a third of your life uncomfortable?

Direct Ergonomics offers a wide range of accessories to help improve your daily work experience. Standing up at work is not the only way to reduce discomfort, the use of monitor arms and antifatigue mats can also help alleviate pressure on your back and neck.

Sit to Stand Converters

Sit to Stand workstations help break up long periods of inactivity and sitting by raising your desk or computer to standing height, allowing you the freedom to move around without interrupting your work.

The sit-to-stand workstations fall into two main categories – sit to stand Desks, and desktop sit-to-stand portable workstations. Portable sit-to-stand workstations are a great way to experience the benefits of a sit-to-stand desk without the high cost of a new desk.

The benefits of each are outlined below:

Sit to Stand Desks	Portable Sit to Stand Workstations
No need to re-arrange your desk or move items to a new workstation, the entire desk moves up and down	Relocating office? Portable sit to stand options are easy to set up and perfect for moving around.
Larger desk space, more room for all your belongings and documents	More affordable! And ask us about trial options for your office.
Larger carrying capacity – never worry about weight capacity.	You don't have to give up your existing desk, portable options will sit atop of any existing desk (of correct depth).

The main benefit of a portable workstation is that you are able to convert any existing workstation into a sit-to-stand workstation. This is particularly useful for shared office spaces or dynamic workplaces where staff change roles or offices regularly.

Choosing a portable workstation can also save hundreds of dollars per unit compared to a sit-to-stand desk, making it an affordable option for small batch orders.

Our Sit-to-Stand desks can be found in the Workstations section on pages 9-11.

FAQs

How do I contact Direct Ergonomics?

You can contact us by phone, at (02) 8437 5400, or by email, at sales@directergonomics.com.au.

What are your standard lead times?

StandUp units are generally held in stock, and are dispatched within 24-36 hours of order placement.

An indicative lead time is 1-2 weeks for stocked products, 2-3 weeks for chairs, and 3-4 weeks for most other products.

Please note that custom build items, large quantities, rural freight and installation, and complexity of items can affect the lead time for your order.

If you have strict time frames for delivery, it is best to call our sales team on 02 8437 5400, who can give you an estimated lead time for your order.

What are your freight charges?

We ship all around Australia. Prices vary with the quantity, size and type of items ordered, as well as the delivery location.

Please contact our sales team to arrange a quote for a more accurate estimate for freight and installation fees, the more you buy the cheaper the freight becomes, so please call.

Is installation included?

Many of our products will be delivered flat-packed and require some assembly. Installation and assembly is typically included in your quote if required, however your quote may not include additional services such as disposal of existing furniture, soft wiring, and weekend or out of office hours installation fees.

Please discuss your quote with your sales representative to make sure your quote includes all the services you require.

Do you offer a repair service?

Yes, we are able to repair existing furniture. Please contact our sales team via email at sales@directergo.com.au with images of the damaged furniture. We will assess the damage and issue a quote for replacement parts and installation / service fees, as required.

Do you offer a re-upholstery service?

Yes, we are able to reupholster existing furniture. Please contact our sales team at sales@directergo.com.au with images of the furniture. We will issue a quote for the re-upholstery of the items.

DISCLAIMER: The prices in this brochure are indicative, and are based on 2019 pricing for single quantities in house colours and fabrics. Discounts available for volume. These prices are subject to change without warning, and may increase due to fabric, colour, design, custom sizing, or increase in production costs. Please contact our sales team directly for an official quote and accurate pricing.
