Mars Monitor Arms

Product Data Specification

Illustrated: Mars Single Arm

Illustrated: Mars Dual Arm

Featuring slim arms and outstanding flexibility, the **Mars Monitor Arm** combines great look and smooth movement resulting in a better work experience. The single mounting location removes unnecessary clutter from your workspace and allows for more usable space under your monitors.

Internal spring mechanism provides safe and secure movements. This monitor arm is ideal for applications requiring frequent display adjustments, including financial analysis, creative work and more.

With an ever growing need to charge your devices, on the base of the monitor arm there are 2x USB-A 3.0 Ports with a 1.8 metre Male USB-A Port to reach your charger, allowing simple charging on your desktop.

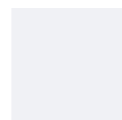

Perfect for where frequent display adjustment is required. A quick-release VESA plate allows for effortless monitor installation and removal.

A visible tension indicator assists with adjusting multiple arms and displays to the correct balance. Built-in 180° rotation stop prevents interference with the wall or partitions. The cable management conceals the wires for a clutter-free appearance.
